Palmer® Audiotools

be true to your sound.

Palmer® began in 1980 as a small, German custom manufacturer and has since grown into an internationally renowned brand, trusted by audio professionals all over the world. Whether in the studio, on stage, in broadcast facilities, or in professional installations, our products excel with outstanding sound quality, unwavering reliability, and a level of functionality that's truly well thought out.

For integrators, we offer an extensive portfolio of solutions perfectly tailored to today's evolving audio setups. From robust DI boxes, splitters, and line isolators, we ensure that every step in the signal path remains transparent and accurate. This attention to detail is crucial for premium sound installations, where efficiency, user-friendliness, and sonic fidelity all play an equally important role.

We understand that every detail matters in professional audio environments. That's why we continuously invest in research, development, and rigorous quality assurance to provide integrators, musicians, audio engineers, and broadcasters with tools that harmonize seamlessly and integrate smoothly into existing setups. Our solutions are designed not only to be durable but also to deliver measurable added value for a wide range of applications.

All this underscores our steadfast commitment to delivering authentic sound and maximum reliability – true to our guiding principle: **Be true to your sound.**

Palmer[®] River Series

DI boxes | Interfaces | Line Isolation Boxes
Merge & Split Boxes | Guitar Tools

The RIVER Series by Palmer[®] represents a top-tier lineup of audio tools that expertly combine sophisticated design, practical functionality, and advanced technology.

Featuring a diverse range of passive and active devices – including DI boxes, line isolators, splitters, interfaces, and summing units – the series is tailored to meet the needs of both stage and studio professionals. Built with durable metal enclosures and high-quality components, the RIVER Series is designed for exceptional reliability and longevity.

Its robust construction ensures stable operation even in demanding environments, while maintaining crystal-clear signal integrity. Whether used in complex live sound setups or precise studio applications, the RIVER Series delivers outstanding performance and versatility, embodying Palmer's commitment to professional audio excellence.

Gravity® Stands

High-quality stand solutions.
Designed in Germany

Gravity offers innovative stand and accessory solutions renowned for their stability, solidity, durability, reliability and easy handling – temporary on stage, for mobile use when traveling or for fixed installation in TV studios or theaters. Developed in Germany, Gravity stands combine superior build quality and durability with smart features and stylish design. The ever-growing portfolio covers a vast range of safe and flexible mounting options for your equipment – from classic microphone and speaker stands to lighting technology, cameras, bags and transport systems.

Speakers up to 20 kg, white

Business solutions

Flexible support in every environment

The Gravity stand solutions are not only found on stages or in production studios. With a large selection of professional mounting brackets and other helpers, the systems also excel in conference rooms, office environments and more. This allows screens, conference cameras and speakers to be securely mounted on walls or ceilings and flexibly aligned to the individual room situation. For presentations and lectures, mobile desks for laptops and tablets are also available if required.

Ready Made Cables

Matching cables
for every application

Our ready-made cables feel at home on any stage and are available in three versions: 3-star, 4-star or 5-star. Depending on budget and application, all customers will find the perfect solution - starting from microphone cables with Adam Hall, Rean® and Neutrik® plugs to 3 and 5-pole DMX cables to professional speaker cables in different wire cross-sections. No matter what Adam Hall cable you choose: Your signals are on the right and safe path!

- OFC (oxygen-free-copper)
- Standard- or large Conductor
- Braided Shielding
- UV-resistant PVC Jacket

Network Cables

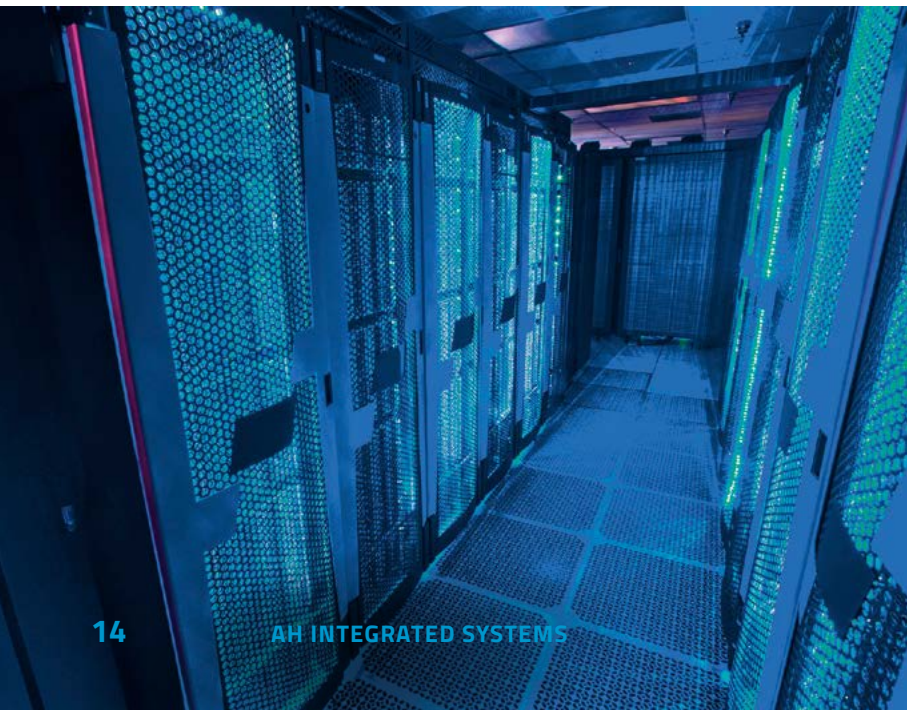

Fast and interference-free
transmission

Network cables build the backbone of modern installation projects and transport data and control signals to any location within a network. Depending on the application and transmission requirements, Cat.5e (for 1 Gbit networks) and Cat.6a cables (for 10 Gbit networks) have become the standard for professional, stationary use. Water-resistant IP65 versions are available for outdoor installation. For easy cable management, cable pockets in various sizes and designs as well as cable holders for wall mounting are also available.

Bulk Cables

Customized solutions for
every project

Compared to plug-and-play applications, bulk cables offer several benefits for installation projects: Cutting to the exact length avoids overlengths and unnecessary extensions. Furthermore, bulk cables allow the free choice of connectors to suit the respective customer's project requirements. In addition, the cables can be better adapted to complex installation conditions and reduce storage and material costs thanks to their universal usability.
