DEFENDER®
CABLE PROTECTION SYSTEMS

**PROTECT
YOUR WORLD!**

OUR MISSION

Helping people work hard and effectively while protecting their most valuable gear / equipment is our driving force. Listening to their needs and ensuring their full satisfaction is our top priority. To achieve this, we are focused on creating relevant, innovative, user-friendly and performance-oriented solutions so that more people can feel safe and experience protection.

If you organise events, you know you have a special responsibility for both people and equipment. Cables and hoses are easily damaged and can quickly become trip hazards. Whatever the environment – be it industrial halls, construction sites, trade fairs, or on film and television sets – those responsible within the industry, our public institutions, civilian rescue services, fire brigades and the military must find the most effective way to protect the working environment.

DEFENDER® cable protectors are the German-made solution that feature an innovative, non-slip surface design. They protect cables and hoses at different load levels, including protection from – and providing accessibility to – heavy goods vehicles. Our highly robust cable protection systems are made of particularly hard-wearing, recyclable TPU (thermo-plastic polyurethane). They meet the highest quality standards and are easy to use, thanks to their secure locking lids and self-cleaning hinges. All DEFENDER® products are regularly tested and approved by TÜV-SÜD.

DEFENDER® also offers custom-made products and system solutions to meet unique individual requirements.
