DESIGN MEETS QUALITY

PREMIUM STANDS BY GRAVITY®

Whether you're a stage-man or a studio-hound, you know exactly what matters in a microphone-, speaker-, lighting- or instrument- stand: Stability, strength, durability, reliability and easy handling. In short: Quality. To this end, our Gravity® products are manufactured from the highest quality materials: super sturdy precision tubes, die-cast zinc and dual injection-moulded thermoplastic.

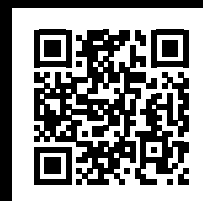

But the stands also need to look good. And this is where the perfect combination of simple functionality and good looks makes Gravity® stand out from the crowd. See for yourself: Check out the contemporary G-rings for colour-coding and identification, or the new super-rugged Gravity® Touring Series, specially developed for the rental sector.

Because we both recognise and meet your requirements for stands and accessories, we are able to offer a 5-year warranty on all Gravity® products.

Gravity® - Take The Stage

- ✓ Stands and accessories for stage, studio and home use.
- ✓ 5-year warranty on all Gravity® products.
- ✓ Professional functionality with innovative details.
- ✓ Designed and engineered in Germany.
- ✓ Ultra-durable construction, built to last.
- ✓ High strength precision tubing and die-cast zinc components.
- ✓ Soft touch rubber-coated clamps and knobs.
- ✓ Double injection molded adjustment knobs.
- ✓ Replaceable rubber marker rings for color coding and personalizing your stand.

G-RINGS

THE STYLE FACTOR

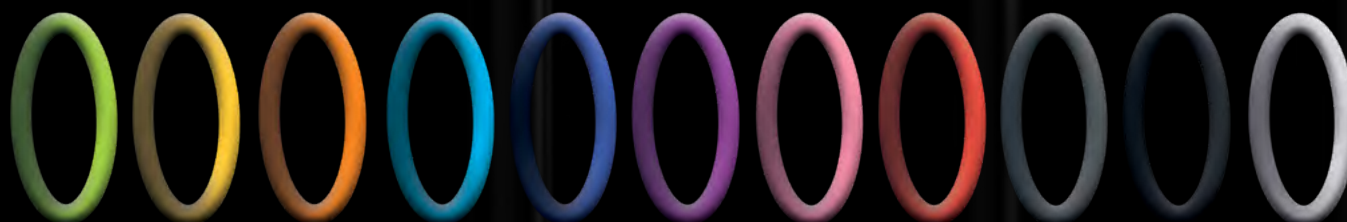

At Gravity®, we believe that stands are more than just accessories. Ultimately, they are part of the show. That's why we build them for heavy duty use and easy, ergonomic handling. But we also opted for a stylish look that sets them apart from dime-a-dozen stands and makes a strong visual statement.

Gravity® products feature our unique sheen green "G" rings that are replaceable in seconds. Available in a variety of attractive colors, you can now customize your stands with additional ring packs and match them to your show's visuals, music genre or personal preference.

What's more, the smart "G" ring concept provides convenient color coding to indicate a stand's intended purpose, placement on stage or the performer to use it. Just pick your colors to add style and distinction to your stands, or choose vanta black "G" rings for a classic, discreet look. Black rings are included with all Gravity® products.

GRAVITY® ORIGINAL REPLACEMENT PARTS

Built for durability and longevity, Gravity® products are constructed from premium quality materials, such as heavy duty aluminum and steel, tough die-cast zinc and hardwearing thermoplastics.

In the unlikely event that the strains of stage and studio use take their toll, we offer a comprehensive selection of original replacement parts.

Gravity® replacement parts are field serviceable enabling easy repair to extend the life of your Gravity® product and provide an eco-friendly alternative to the planned obsolescence of throwaway designs.

TOURING SERIES

TMS 2222

SHORT TOURING SERIES MICROPHONE STAND
WITH ROUND BASE AND 2-POINT ADJUSTMENT
TELESCOPING BOOM

The Gravity® Touring series microphone stands are built to be extremely sturdy with especially strong steel tubing. The boom mount of the Gravity® TMS 2222 short microphone stand is crafted from indestructible die-cast zinc and has an adjustment range of 51 to 88 cm. The locking screw - which is unloosable - can be quickly and easily engaged with just a $\frac{3}{4}$ turn, ensuring the boom stays securely in place. Height adjustment is just as easy and extremely quick via the easy-grip, triangular tightening sleeve.

Another standout feature of this Microphone stand is its improved round base which provides a stable and secure footing thanks to its weight and flat rubber feet. Made for touring, the Gravity® TMS 2222 round base mic stand will stand with you on your gigs with its sturdy and long-lasting construction.

Weight	6.67 kg

Crafted from robust tubular steel, the TMS 4232 B / TMS 4332 B features three folding feet, ensuring a secure stance even in demanding environments. The bell-and-boom holder constructed from indestructible die-cast zinc guarantees longevity under constant handling.

Effortless adjustment is key during hectic set-ups, which is why the boom is equipped with a T-bar locking screw for quick and secure positioning. Transporting the stand is made easy thanks to its compatibility with standard microphone stand tube cases.

To prevent the loss of vital components during the hustle of touring, solid metal knobs are securely affixed to the stand. Setting up and dismantling the TMS 4232 B / TMS 4332 B is a breeze: a mere 3/4 turn of the adjusting screw locks the boom securely in place, while height adjustments are easily achieved with the ergonomic triangular clamping sleeve.

TOURING SERIES

TMS 4321 B

TOURING SERIES TRIPOD MIC STAND WITH 2-POINT ADJUSTMENT STANDARD BOOM

Tours and events often operate under hard conditions and time pressures. Microphone stands are thrown around and not generally treated gently. That's why Gravity® Touring series microphone stands are built to be extremely sturdy. Made with especially strong steel tubing with three folding feet. The base and boom mount are made of indestructible die-cast zinc. The solid metal knobs are unlosable, to ensure that the stands survive the hard conditions of touring longer. The microphone stands are also faster to set up and take down. Turning the locking screw just 3/4 quickly snaps the boom into place. Height adjustment is just as easy, with incredibly quick tightening of the easy-grip, triangular tightening sleeve.

MS 5311 B

TRAVELER MICROPHONE STAND

Every bit of weight counts when you're travelling by plane or truck from one gig to the next. After all, you can't always rely on the concert venue having the right tool available for you when needed.

The Gravity® MS 5311 B microphone stand can be taken everywhere you go. It's so light, there's absolutely no need for you to worry about weight or availability.

Despite its light weight, the stand is still sturdy and strong. Its robust leg construction withstands heavy loads and gives the stand a solid foundation. The position and tilt of the boom can be adjusted quickly and easily at the joint with only one clamping screw. The handle, used for smoothly and securely adjusting the stand's height, and the clamping screw are made of exceptionally durable ABS plastic and covered with a non-slip soft-touch thermoplastic coating for comfortable operation.

Gravity® has once again delivered a useful and reliable product for you to round off your collection of stands.

MICROPHONE STANDS

MS 231 HB

MICROPHONE STAND WITH ROUND BASE AND ONE-HAND CLUTCH

The MS 231 HB is a premium quality microphone stand with thick walled tubing, powder coated finish and 175 cm maximum height. Made of cast iron, the heavy duty round base features a rubber ring at the bottom for acoustic isolation and surface protection. The MS 231 HB sports a slim, innovative clutch for convenient one-handed height adjustment. The ergonomic design and soft touch surface of the clutch handle provide a secure grip in all situations. The custom designed retainer requires no tools for quick and secure microphone clip attachment. A set of black coding rings is included with the MS 231 HB, additional ring packs are available in a wide array of colors for instant personalization. For increased stability we offer a 2.3 kg add-on weight plate that installs without tools (part no. MS 2 WP).

XSP 1062

COUNTER NUT 3/8"

MS 23 XLR B

MICROPHONE STAND WITH XLR CONNECTOR AND GOOSENECK

Enabling ultra flexible microphone orientation, this premium quality stand features a 36.5 cm gooseneck on a thick walled 114.5 cm tube and a heavy duty round base made of cast iron. The gooseneck integrates a 3-pin female XLR connector for directly attaching a microphone while the tube sports a lateral XLR mic cable connector at the bottom end. This permits quick, clean setup without mic clips and running the cable up the stand. To extend the stand's height and increase stability, additional XLR goosenecks (item no. XSP 10175) and a weight disc (item no. MS 2 WP) are available as accessories.

MA POP 1

POP FILTER WITH VARI®-ARM

To make sure your pop filter successfully filters undesired pop noises and clipping, you need to be able to position it perfectly in front of your mouth. This is simple with the Gravity® MA POP 1 pop filter, with its large screen diameter, double nylon mesh and VARI®-ARM.

The VARI®-ARM allows you to position the pop filter precisely where it will work best, and then fix into position so that it won't shift.

All joints can be moved using only one single adjustment screw. Once the desired position has been achieved, you simply tighten the screw to fix the whole VARI®-ARM. This way, your pop filter won't slip out of position while you're sitting at your desk creating a podcast or standing in the studio booth recording vocals.

The solid clamp fits on any microphone stand, on the edge of a table or any other surface you want to attach it within the clamping range of 15 mm to 35 mm.

Product number	GMAPOP1
Product type	Microphone accessories
Type	Pop filter
Material VARI®-ARM	Steel
Colour	Black
Mounting	Microphone stand, tabletop
Screen diameter	157 mm
Setup	Double nylon screen, plastic frame
Fits tube diameters up to	15 mm to 35 mm
Weight	0.5 kg

Material	Cast iron
Colour	Black
Surface	Powder coated
Diameter	210 mm
Weight	2.3 kg

XSP 10129

HOLDER FOR WB 123 WPB WEIGHT PLATES

Speaker stands with a round base, such as the Gravity® SSP WB SET 1, save space when set up and can be fitted with an additional weight plate to provide an even more stable stand. In order to mount the 5 kg WB 123 WPB weight plate firmly on the underside of the base plate, Gravity® has developed an additional retaining cross that provides even more stable securing than the enclosed mounting brackets.

The cross-shaped bracket made of steel convinces with its robust and durable construction. At the same time, it ensures optimal fastening by screwing it to the base plate and prevents the optional weight plate from accidentally falling out.

Product number	GXSP10129
Product type	Stands and tripod accessories
Type	Bracket for weight plates
Colour	Black
Material	Steel
Surface	Powder coated
Dimensions	380 x 380 mm
Weight	0.44 kg

MS STB 01 PRO

STEREO ARRAY MICROPHONE BAR
60 - 290 MM

Precise and repeatable arrangements of two microphones for stereo recordings are the specialty of the Gravity Stereo Bar. This real precision instrument allows the exact adjustment of the distance between the movable microphone holders from 6 to 29 cm, the microphone alignment on the horizontal axis by +/- 90° and +/- 90° inclination of the entire rail. Easy-to-read spacing and angle markings facilitate fast and precise positioning, taking notes of your settings and recreating them without effort. Set screws with ergonomic soft-touch knobs securely lock the adjustable parts in the desired position.

The Gravity® Stereo Mic Bar is suitable for common stereo recording techniques including ORTF, DIN, XY and AB patterns and mounts on any mic stand. It is engineered from strong yet lightweight aluminum and easily able to support two large diaphragm microphones.

SPEAKER STANDS

Gravity® speaker stands use thick walled precision tubing, steel height adjustment collars and redesigned leg housings for maximum strength and durability. Air cushion and hand crank versions greatly facilitate lifting and lowering heavy loads, and our low-profile round base model provides an elegant, small footprint alternative to conventional tripods. In addition, the Gravity® range includes stands for your studio monitors, subwoofer poles and a selection of stand adapters.

SPEAKER STANDS

FEATURES

Sturdy, virtually indestructible steel collar with safety pin

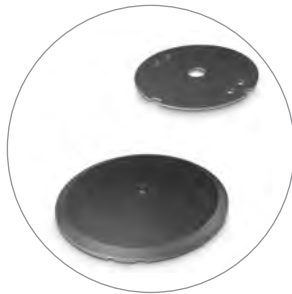

Comfortable ergonomic knobs

Specially designed aluminum die-cast leg collar for superior strength

Crank operation for easy speaker raising and lowering

VARI®-Weight - Low-profile 9 kg cast iron base and a 5 kg weight plate which installs without tools

Tight, secure fit

TSP 5212 LB

TOURING SERIES STEEL SPEAKER STAND WITH AUTO LOCKPIN®

The hard conditions and extreme time pressures of touring are for strong workers and robust materials only - such as the Gravity® Touring series speaker stand. Extremely sturdy, with three double-braced legs and a die-cast aluminum mounting bracket. Especially strong steel tubing for a 50 kg load capacity. Set-up and take-down are extremely quick and safe thanks to the automatic, snap-in LockPin®. The 35 mm extension pole is locked into place and the pin can only be unlocked with the release lever. The loudspeaker stand can be adjusted to a height of up to 195 cm. The locking screws, with solid, unlosable metal knobs, are an invaluable advantage when touring.

TRAVELER SERIES

SP 5112 B

TRAVELER SPEAKER STAND

The Gravity® SP 5112 B speaker stand can be taken everywhere you go. It's so light, there's absolutely no need for you to worry about weight or availability.

In addition to its lightness, the stand is stable, steady and offers you a load capacity of 15 kg at a maximum height of 120 cm. The compact leg construction and the slim extension tube with a diameter of just 25 mm not only allow the attachment of all other Traveler products that have the typical clamp, but also ensure an extremely small transport volume and thus give you the option of taking the stand with you everywhere you go. The height of the SP 5112 B is adjusted using Gravity's® signature screw knob, which is made of highly durable ABS with a non-slip soft-touch thermoplastic coating and is therefore extremely gentle for your hands.

SP 5111 B

SHORT ALUMINUM LOUDSPEAKER STAND 35 MM BLACK

If you want to set up your loudspeakers in a stable and secure way, or place your laptop in a firm and safe position, the SP 5111 B, as a short classic tripod loudspeaker stand, is exactly the right thing for you. It is made of sturdy but lightweight aluminum with black powder coating and can support up to 35 kg at a maximum height of 132 cm.

The Loudspeaker stand is excellent for attaching the Gravity® LTS TRAY 1 laptop tray and other 36 mm attachments that you need to use based on your body height.

Its mounting for the base is manufactured from die-cast aluminium. The steel sleeve for adjusting the height is virtually indestructible and offers additional stability. A locking pin holds the 35 mm thick extension tube in place. The ergonomic knobs for the set screws are made of highly durable ABS plastic and covered with a non-slip soft-touch thermoplastic coating for comfortable handling.

Thanks to its compact size and low weight of 1.94 kg, the short loudspeaker stand is perfect for portable use.

SP 5522 B

TWIN EXTENSION SPEAKER & LIGHTING STAND

The SP 5522 B is a classic tripod speaker and lighting stand made from thick walled, yet lightweight powder coated steel tubing with a load capacity of 30 kg and twin extensions for a maximum height of 3 m.

The die-cast aluminum leg collar has been completely redesigned to provide superior durability and longevity. The unbreakable height adjustment collars are made of steel for additional strength featuring safety pins to securely lock the extensions in place. The ergonomic set screw knobs are made from high grade ABS with a soft touch, non-slip thermoplastic coating for comfortable handling. A set of black coding rings is included with the SP 5522 B, additional ring packs are available in a wide array of colors for instant personalization.

SP 5211 GS B

ALUMINUM SPEAKER STAND WITH GAS SPRING 35 MM
BLACK

Raising and lowering your loudspeakers while being kind to your back - that's what the Gravity® SP 5211 GS B speaker stand with gas spring were made for.

The SP 5211 GS B is a classic tripod speaker stand made of strong but lightweight aluminium tubing. A gas spring is installed inside the stand, which lifts all conventional loudspeakers weighing up to 18 kg. All you need to do is loosen the adjustment screw and watch your speakers or spotlights rise - up to a height of 194 cm.

The stand ensures maximum stability with support feet made of die-cast aluminium and a height-adjustable steel sleeve that is virtually indestructible - as with all Gravity® stands.

The ergonomic adjustment screws on the top of the sleeve and bottom of the base are made of highly resistant ABS with a non-slip soft-touch cover made of thermoplastic. They provide for very comfortable handling when screwing open and closed. A set of black rings is also included in the scope of delivery and additional colours are available for personalization.

The Gravity® SP 5211 GS B speaker stand offers you heavy-duty and back-friendly support, which will be a loyal companion for many gigs to come - thanks to its sturdy construction.

TOURING SERIES

TSP 2332 B

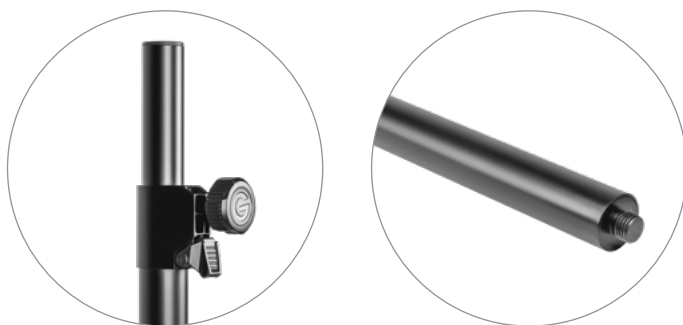

ADJUSTABLE TOURING SPEAKER POLE 35 MM TO M 20
1400 MM

To make sure that you can mount your speakers on your subwoofers in a time-saving and optimal way during tough touring conditions, Gravity® offers the TSP 2332 B speaker pole.

The solid construction made of black powder-coated steel is height adjustable from 82 to 140 cm using the automatic LockPin® mechanism specially designed for the Touring series.

This makes setup much faster, because the height adjustment lock snaps automatically into place when pulled up. No additional pin is required.

The Gravity® TSP 2332 B has an M20 thread at the bottom end of the pole, so you can simply screw it onto your subwoofer.

SP 2342 GS B

ADJUSTABLE GAS SPRING SPEAKER POLE 35 MM TO M20
1790 MM

Raising and lowering your loudspeakers while being kind to your back - that's what the Gravity® SP 2342 GS B speaker pole with gas spring was made for.

The SP 2342 GS B is a classic speaker pole made of strong, lightweight aluminum. A gas spring is installed inside the pole, which lifts all conventional loudspeakers weighing up to 18 kg. All you need to do is loosen the adjustment screw - and watch your speakers go up.

The pole ensures maximum stability, as the steel sleeve of the height adjustment is practically indestructible - as with all Gravity® stands and poles. Fully extended, the speaker pole is 110.5 cm long and the M20 thread at the lower end allows you to screw it onto all standard PA subwoofers and stands.

The ergonomic adjustment screw on the sleeve is made of highly resistant ABS with a non-slip soft-touch thermoplastic cover, making it comfortable to screw on and off. A set of black rings is also included in the scope of delivery and additional colours are available for personalization.

The Gravity® SP 2342 GS B speaker pole offers you heavy-duty and back-friendly support, which will be a loyal companion for many gigs to come - thanks to its sturdy construction.

SP 3102 TM

FLEXIBLE STUDIO MONITOR STAND WITH TABLE CLAMP

A mix's sound and feel is heavily influenced by having your monitors placed in the proper position. In a home studio, however, where space is at a premium, it's not always possible to put your studio monitors right next to a table using suitable stands. The Gravity® SP 3102 & SP 3102 TM are the perfect solution to this problem.

SP 3102 C B

COMPACT STUDIO MONITOR TABLE STAND

Professional productions need a big studio - this guiding principle was considered irrefutable for decades. Today, entire albums are produced in small home studios. Getting the most out of a cramped environment requires compact and well thought-out solutions, like the Gravity® SP 3102 C B studio monitor table stand.

With the SP 3102 C B, you can place your studio monitors directly on your desk without worrying about stability or taking up too much space. Thanks to the continuously height adjustment, the monitoring speakers can be precisely aligned with your sitting position - and the stereo triangle is ready!

The SP 3102 C B is based on a robust steel construction that ensures a secure stand for your studio monitors. The rubberised non-slip feet on the bottom of the table base and the EVA-padded bearing surface for the speaker also contribute to this.

The Gravity® SP 3102 C B is the ideal solution for small tables in home studios and is aimed at users who do not want to give up on a stable stand and precise alignment of the monitors even in cramped environments.

ACCESSORIES SPEAKER STANDS

SA BELT 1 B

RETRACTABLE CROWD BARRIER CASSETTE FOR STAND MOUNTING

Whether you're an event technician, small event organiser or retailer, the SA BELT 1 B crowd barrier cassette for stand mounting offers you absolute flexibility for barriered zones, regulated visitor flow, and highlighting of walkways.

The Gravity® SA BELT 1 B crowd barrier cassette can be extended up to two meters and is self-tensioning. For the required hold of the belt, the retractable belt system has a useful locking function, whereby the belt is solidly held in place.

Any number of barrier cassettes can be combined with each other via the typical three strap clips.

With the SA BELT 1 B, there is no need to buy stands twice and fill up your storage space unnecessarily, as a 5/8" thread is integrated in the cassette itself, both at the top and bottom. Simply screw them onto any microphone or speaker stand with 3/8", 5/8" or M10 threads.

And to make sure you always have the right adapter at hand, the necessary adapters are included with this very cleverly conceived barrier belt system.

With the SA BELT 1 B, Gravity® offers you a versatile system to signalise short and long walkways, for entrance control, stage barriers or trade fairs.

SA VESA 1

35 MM POLE MOUNT LCD TV MONITOR BRACKET

This universal bracket is suitable for all flat screen monitors with VESA standard mounting hole patterns from 75 x 75 to 400 x 400 mm and securely clamps to 35 mm speaker poles. The heavy duty steel construction with black powder coating finish has a maximum load capacity of 30 kg and comes complete with sets of M8 and M6 monitor mounting screws.

Product number	GSAVESAT
Product type	Stands and tripods accessories
Type	Universal monitor mount
Material	Steel
Surface	Powder coated
Colour	Black
Suitable for tube diameter	35 mm
Max. load	30 kg
Suitable for VESA dimensions	75 x 75, 100 x 100, 200 x 100, 200 x 200, 300 x 300, 400 x 200, 400 x 400
Dimensions base plate	240 x 240 mm
Material thickness base plate	3 mm
Length extensions	240 mm
Width extensions	45 mm
Material thickness extensions	2 mm
Interchangeable rings	1 x 25 mm
Black ring pack included	Yes
Accessories (included)	4 x extensions, 4 x M6 screws, 4x distance holders, Base plate with 35 mm pole mount and locking screw, 4 x M8 screws, 8 x M6 countersunk screws
Weight	2.71 kg

SP VARI®-LEG 01

LEVELING LEG FOR LOUDSPEAKER AND LIGHTING STANDS

Place your speaker or lighting stands securely on uneven or slanted subfloors including steps and stairs. Gravity's VARI®-LEG 01 leveling leg provides continuously variable leg length compensation up to 25 cm. It fits all leg tubes with 33 to 37 mm inner diameter, mounts quickly and easily without the need for tools and remains on the stand when no leveling is required.

Product number	GSPVARILEG01
Product type	Stands and tripods
Type	Extension
Material	Steel / plastic
Surface	Powder coated
Colour	Black
Suitable for inner tube diameter	33 - 37 mm
Length	340 mm
Max. Extension	250 mm
Accessories (included)	2 x Compensating Feet, clip for the spirit level
Weight	0.33 kg

SA LC 35 B

CLIP-ON SPIRIT LEVEL FOR 35 MM POLES

Mounting Gravity® VARI®-POLES and similar products perfectly horizontal or vertical is dead easy with this spirit level. Made of heavy-duty ABS, it simply clips to any pole with 34 to 45 mm diameter. In addition, the Gravity® clip-on spirit level is a must-have accessory for loudspeaker stands with levelling legs, e.g. the Gravity®-VARI®-LEG.

Product number	GSALC35B
Product type	Stands and tripod accessories
Material	ABS plastic
Colour	Black
Suitable for tube diameter	34 - 45 mm
Weight	0.01 kg

LIGHTING STANDS

Featuring premium materials and ultra durable construction, Gravity® lighting stands ensure years of reliable service. They are available in classic tripod versions or with a heavy low-profile steel base for unobtrusive placement. Gravity® lighting stands provide secure adjustment and maximum stability to safely put your fixtures where you need them.

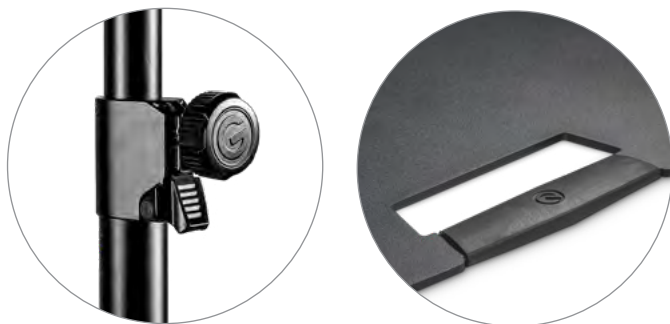

LIGHTING STANDS

TOURING SERIES

TLS 431 B

TOURING-LIGHTING STAND WITH SQUARE STEEL BASE

Well equipped to handle the daily grind and time constraints of touring: That's the TLS 431 B light stand from the Gravity® Touring Series. Its heavy steel base featuring three M20 female threads for off-centre installation guarantees a firm footing in all circumstances, whereas two integrated handles make it easy to transport. In comparison to the standard series, the base is slightly smaller, but it still offers the same amount of stability. The added bonus here is that it can now also be used as a divider in Transflex cases. The base-to-pole connection has been made stronger by adding a reinforcing sleeve to prevent wobbling. With the 35 mm extension tube featuring a M10 female thread, the stand can be extended in height up to 2.40 meters. Thanks to the automatic LockPin® technology, it has never been easier to adjust the height of a stand. Because the pin automatically snaps into the holes when adjusting upwards, a separate locking pin is no longer necessary.

Product number	GTLS431B
Product type	Stands and tripods
Type	Lighting stands
Tubing material	Steel
Colour	Black
Surface	Powder coated
Min. height	1430 mm

LS TBTV 17 / 28

LIGHTING STAND WITH T-BAR SMALL / LARGE

The LS TBTV 17 & LS TBTV 28 is a classic tripod lighting stand with twin extensions, made from thick walled, yet lightweight powder coated steel tubing. The die-cast aluminum leg collar has been completely redesigned to provide superior durability and longevity.

The unbreakable height adjustment collars are made of die-cast aluminum for additional strength. The ergonomic set screw knobs are made from high grade ABS with a soft touch, non-slip thermoplastic coating for comfortable handling. The stand includes a T-Bar with an ergonomically formed and rubberised T-Bar – making the T-Bar not only easier to handle and carry but also better looking than regular stands.

LS SUPER TB 01

SUPER MINI T-BAR FOR 35 MM TRIPODS

If you are a rental or installation company, DJ or solo entertainer, you have almost certainly experienced this or a similar situation: You need two spotlights to illuminate a specific area. As a professional, you aspire to make your construction discreet and attractive. Ideally it should not attract attention. There are slimline, elegant stands for this, such as the LS 331 B from Gravity. However, if you install a standard T-bar, the combination appears clumsy and oversized. You don't need a clavilux, just two spots.

The LS SUPER TB 01 Super Mini T-Bar provides the appropriate solution for this problem: With its elegant construction and adjustable width of 390-570 mm, it blends seamlessly into any environment, even museums and galleries. Thanks to the 17-mm TV spigot insert, lamps can be easily clicked into position, removing the tedious requirement of securing them with screws and wing nuts. Its flexible design enables lamps to be attached upright on the bar or suspended from it. However, despite its slimline elegance, there has been no compromise to the ruggedness of the LS SUPER TB 01: Maximum symmetrical load capacity is 20 kg per side. Spigot interval is adjustable from 330-515 mm. And if you need another spot or two, extra spigot inserts can be installed in the additional mounting holes.

As you are probably already aware, ergonomic locking screws, interchangeable colour rings and high-quality workmanship come as standard with all Gravity products. The integrated Allen key holder is a small extra feature that makes this T-bar even more user-friendly.

Weight	1.7 kg

LS OP 1

REMOTE OPERATING POLE FOR SPOTLIGHTS

Anyone who works as a lighting technician in theatres, TV studios, congress centres or other production venues knows: the optimal illumination of a stage is precision work. At the same time, the tight schedules of a production rarely allow for fetching a ladder every time to manually adjust static spotlights high up in the rig - not to mention the safety risk for the people on site.

With the LS OP 1, Gravity® has a solution for these situations in its portfolio. The extendable operating pole enables the alignment of installed spotlights at great heights. The adjustment options include the pan and tilt angle, as well as focus adjustment (Pan/Tilt/Focus) via standard bells and the folding of barndoors.

ACCESSORIES LIGHTING STANDS

PAD SET 2

PIPE AND DRAPE CURTAIN SYSTEM INCL. CURTAIN

The Gravity® Pipe and Drape curtain system offers an innovative solution for musicians, bands, event technicians, theatres, exhibitors and stand builders. It enables swift and efficient room structuring, area partitioning, wall suspension, or walkway delineation. Utilising the PAD SET 2, consisting of the PAD A adapter, the PAD T telescopic pole and the PAD C B 1 Molton curtain, standard speaker or lighting stands with 35 mm mounts can seamlessly transform into comprehensive pipe and drape setups with minimal effort. Simply place the PAD A on to the stand and attach the telescopic pole by inserting its mounting bolts into the adapter's holes. The Molton curtain can then be effortlessly affixed to the crossbar.

Constructed from steel and plastic, the PAD A features an internal diameter of 36 mm, perfectly suited for accommodating a 35 mm stand. It boasts four fixing holes on the top, enabling the mounting of up to four PAD T telescopic poles. With its convenient snap-in function for securing the telescopic pole mounting bolts, users can effortlessly and securely lock the poles in place in a matter of seconds.

Crafted from aluminium, the PAD T telescopic pole extends from 190 cm to 350 cm, enabling customisable system widths. Featuring tilt joints at both ends, the pole facilitates straight-forward and adaptable assembly without requiring a ladder or assistance from others. The PAD C B 1 black Molton curtain measures 3.50 m x 2.55 m and features a convenient Velcro strip for effortless attachment to the PAD T traverse. Crafted from EURO molton, this flame-retardant curtain boasts an opacity of 320 g/m² and has a total weight of just under 3 kg.

KEYBOARD STANDS

KSX 2 RD

SET WITH KEYBOARD STAND X-FORM DOUBLE AND RAPID DESK

Especially on tour it is important that all instruments, equipment and accessories are compactly packed and can be easily stowed away in the bus. That's why the KSX 2 RD combines the stable Gravity KSX 2 keyboard stand with a double X-form and the Gravity Rapid Desk KS RD 1. That makes it easy for you to put up a sturdy table in a few simple steps and also to take it down into two separated flat pieces. Plus, this combination works in pretty much every situation, no matter if you're playing in the studio or practicing in the rehearsal room.

KEYBOARD STANDS

KS MKS 01 B

MULTI KEYBOARD STAND

As a musician, you know how important it is to have a reliable and versatile keyboard stand that can accommodate all of your gear. That's where the Multi Keyboardstand comes in. With four levels for keyboards, synths, workstations, grooveboxes, effects, mixers and so on you'll have plenty of space to store all of your equipment. But what really sets the Multi Keyboardstand apart is its fully adjustable supports. No matter whether it is about the distance between the supports or the tilting angle. Everything is freely adjustable, so you can customize the stand to fit your specific needs.

Not only is the Multi Keyboardstand incredibly convenient, it's also built to last. It features an additional set of higher front stoppers for larger Keyboards to keep them secure and stable, and it's made of lightweight and robust aluminium to ensure durability. Plus, it comes with a cable guide to keep your cords organized and a set of self-adhesive measuring tapes to ensure precise placement of your instruments.

In short, the Multi Keyboardstand is the perfect solution for any musician looking to streamline their setup and keep their gear organized and easily accessible. Whether you're using it in the studio or on stage, it's a must-have addition to your musical setup. Don't miss out on the convenience, versatility, and durability of the Multi Keyboardstand!

KEYBOARD STANDS

KS TS 01 B

KEYBOARD STAND TABLE

This keyboard stand with table-like construction offers superior stability making it particularly suitable for heavy keyboards. It is height-adjustable in small incremental steps, making the stand suitable for both seated and standing applications. The legs can be fitted in two basic configurations – either perpendicular to the vertical structure or angled outwards slightly – the latter configuration offers additional stability and more leg room. The top rests can be adjusted to the width of the keyboard and can also be angled in small incremental steps over a range of 360 degrees. All in all, this solid steel construction comprises all features possible in such a design without compromise. For transport, both the legs and the top rest can be folded inwards, resulting in a very compact transport height. The stand includes one VARI®-Foot leveling foot to compensate for ground irregularities.

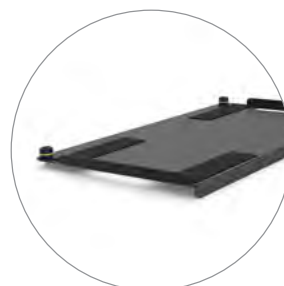

Product number	GKSTS01B
Product type	Stands and tripods
Type	Keyboard stands

adjustment

NS 411 / W

CLASSIC MUSIC STAND

This music stand is based on a classic design. Attention was given to details such as the support joint which is made of die-cast material for a precise fit, the base connector and the height adjustment. Utilising the Gravity® typical ergonomic set screw knobs - made from high-grade ABS with a soft touch, non-slip thermoplastic coating and heavy duty metal joints, this stand is designed to withstand harsh treatment in the everyday life of a musician.

Product number	GNS411 / W

MUSIC STANDS

A music stand is quick to assemble: Fold out the legs, set it up, adjust the height, then adjust the sheet music rest - that's it! If it were just that simple... Sometimes it rattles here, then the clamping screw doesn't tighten properly and the music stand slowly but surely dips backwards. And when a whole choir or a group of music school students needs to be equipped, the details of a stand construction decide whether the performance or rehearsal goes well from the start or not...

With the NS 441 B / W folding music stand, Gravity® has thought of all these potential pitfalls. The robust tripod construction made of solid steel stands firmly on the floor and can be locked in position quickly and easily. The highlight, however, is further up: Here you will find two clamping brackets that have been specially developed for the NS 441 B / W. Instead of tediously adjusting the height of the music rest with clamping screws - and then noticing that the screw connection has been overtightened and no longer grips properly - you simply lift one or both clamps, pull out the stand and push the clamps back down. Now unfold the music stand, tilt it, tighten it and you're done!

The music stand can also be folded to a particularly compact size and safely stored in the neoprene carrying bag that comes with it. This offers two advantages: firstly, it allows you to carry several stands without them getting caught in each other or slipping out of your hands. Secondly, the neoprene material is also resistant to a little rain, so that you can save yourself the tedious task of wiping the stand dry at open-air performances.

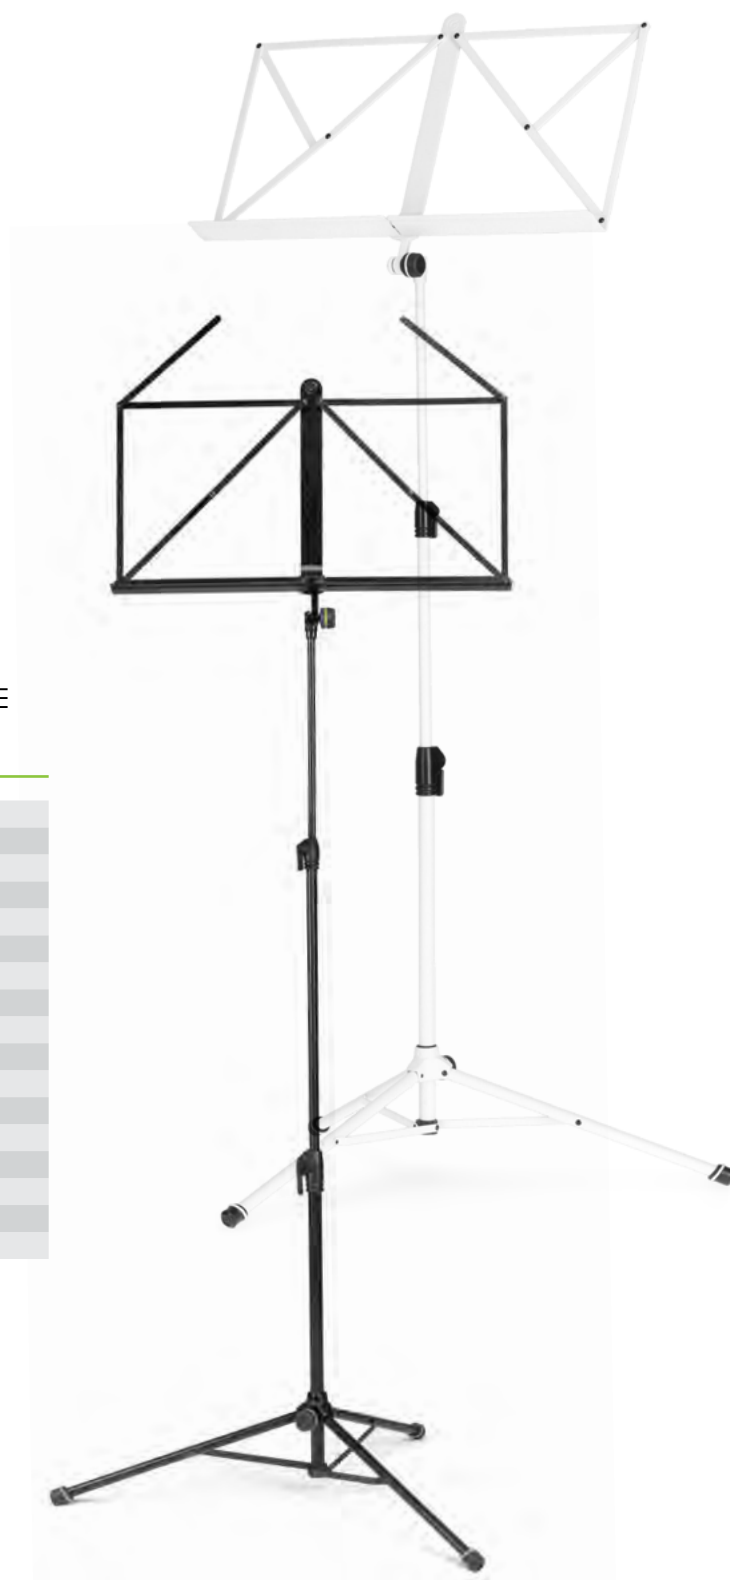

Whether at home practising, in the rehearsal room with the band, at music school or as a choir director - with the NS 441 B / W, Gravity® offers you a flexible and stable companion that can be set up quickly and easily.

VARI®-G

GUITAR RACKS FOR 3 TO 9 INSTRUMENTS

Designed for all acoustic, electric and bass guitars, Gravity® guitar racks are available in four versions accommodating 3, 5, 7 or 9 instruments. They are made of heavy-duty steel tubing with a black powder coating finish. Holding the necks firmly and securely the adjustable soft touch yokes are padded and detachable. The rails supporting the guitar bodies are covered in specifically formulated foam to prevent dents and scratches. Quick to set up and space saving, the Gravity® guitar racks fold up flat for easy transport and storage.

*Not suitable for long-term use with guitars that have a nitro lacquer finish.

SOLO-G

A-FRAME GUITAR STANDS FOR ACOUSTIC AND CLASSICAL GUITARS

The solo-G series consists of 3 stands for acoustic and classical guitars, for electric and bass guitars and a universal design that accommodates most body shapes. The A-frame stands are made of heavy-duty steel tubing with black powder coating finish, soft rubber backrest and EVA support arm padding to protect the instrument's finish and nonslip rubber feet. Providing two splay angle options, the tilt back Solo-G design folds up to compact dimensions nicely for easy portability.

*Not suitable for long-term use with guitars that have a nitro lacquer finish.

GUITAR STANDS

If you're looking for a way to make your guitar collection appear more inspiring, then let the Gravity GLOW STAND® light the way – because it gives your creative space an incredible dose of atmosphere and ambience, setting the perfect mood for you to make your music. But what really sets the guitar GLOW STAND® apart is its magnificent integrated lighting system. Each stand features adjustable ambient LED lighting that allows you to set the perfect mood with your choice of colour and brightness. Whether you're at home, in the studio, or on stage, you can create a captivating ambience that highlights the beauty of your instrument. Simply cycle through the colours by touching the unique responsive panels at the front of the stand base. And best of all, the GLOW STAND® remembers your chosen colour settings each time you switch it off.

The Guitar GLOW STAND® also features an adjustable front spotlight, which can be tilted to accentuate the intricate details of your guitar, elevating it to a true work of art!

Featuring a wide range of colours, the Guitar GLOW STAND® is sure to inspire you everytime you enter your music making space.

*Not suitable for long-term use with guitars that have a nitro lacquer finish.

GS LS A 01 B

GUITAR GLOW STAND® A-FRAME

The Gravity GS LS A 01 B Guitar GLOW STAND® is an illuminated guitar stand that gives your electric guitar or bass maximum support and at the same time highlights it with colour.

It holds your guitar or bass securely and safely, and its soft support surfaces ensure that your musical instrument remains in perfect condition. In addition, the GLOW STAND® has a foam insert at the bottom that can be removed to provide more stable support for electric guitars and basses with strap pins and/or strap locks.

FDJT 01

DJ DESK WITH ADJUSTABLE LAPTOP AND LOUDSPEAKER TRAYS

Creativity has no limits, but workspace certainly does. A place where you can unfold without limits is the Gravity® FDJT 01 DJ desk. On it you keep your set-up compact and always ready for the moment when inspiration strikes.

Your trusty monitors can be placed on the height-adjustable, 360° rotatable and 15° tiltable trays. The precise positioning and inclination of your loudspeakers is made much easier for you by a precise scale on the tubes.

Your laptop is enthroned at the heart of your set-up in the middle of the table, held firmly in place by the integrated pins so that even if tilted extremely, it is always secure. Both loudspeaker and laptop trays can be adjusted precisely along the rear rail of the Gravity® FDJT 01 DJ Desk by shifting them to the left or right.

You will have no trouble adapting the desk to your individual height. It can be set between 680 mm and 1090 mm and offers you plenty of space for your equipment - with a usable depth of 500 mm and a width of 1190 mm.

More stability is provided by the adjustable levelling feet, which compensate for any unevenness of the floor, and the mountable cross bar, which significantly strengthens the table.

DJ DESK

The DJ Desk offers enough space to place two decks and a mixing console or your DJ controller. Your performance setup with samplers, sequencers and synthesizers will also find enough room thanks to a surface depth of 50 cm and a width of 119 cm.

In case you need additional space, simply expand the Gravity® DJ Desk with an optionally available laptop holder or two studio monitor holders. The rear rail also offers further flexible expansion options that are tailored to your individual needs as a DJ, producer or instrumentalist. You will have no trouble adapting the desk to your individual height. It can be set between 68 cm and 109 cm.

More stability is provided by the adjustable levelling feet, which compensate for any unevenness of the floor, and the mountable cross bar, which significantly strengthens the table.

BG DC 1

MULTIFUNCTIONAL DESK PAD 119 X 50 CM*

The Gravity® BG DC 1 is a premium, multifunctional desk pad designed for DJ desks, office desks, and other work surfaces. Measuring 119 cm x 50 cm* with a 5-mm-thick neoprene layer, it fits perfectly with the Gravity® FDJT 01 and FT 01 DJ desks.

Durable and hard-wearing, the BG DC 1 not only protects your surface, but also provides a comfortable, padded work surface with a pleasantly warm feel. Its special surface is water-repellent, skin-friendly, and non-reflective, allowing your mouse to glide smoothly with speed and precision, making it an ideal XXL mouse pad.

Cleanly finished edges prevent fraying, and the non-slip underside ensures a firm grip on almost any surface, keeping the BG DC 1 well in place.

*Size may vary slightly.

Product number	GBGDC
Product type	Stands and tripod accessories
Type	Cover for DJ table
Material	Neoprene
Colour	Black

FT 01 LTT B

FLEXIBLE LAPTOP TRAY FOR DJ DESK

The practical laptop tray with adjustable holding pins extends the functionality of your Gravity® DJ desk (FT 01) and ensures the best view of your laptop. The laptop tray FT 01 LTT B is continuously height-adjustable, rotatable by 360° and tiltable by 15°.

With the adjustable holding pins, the tray holds your laptop, tablet, effects or mixing console securely in place, even when tilted, and thanks to the sophisticated rail system on the DJ desk (FT 01), the laptop tray can also be moved horizontally.

Product number	GFT01LTTB
Product type	Stands and tripods
Type	Laptop stand
Material	Steel
Surface	Powder coated
Colour	Black
Width adjusting jaws	40 mm
Width spacing between adjusting pins min.	120 mm

Height spacing between adjusting pins to adjusting jaws max.	250 mm
Width spacing between adjusting jaws min.	130 mm
Width spacing between adjusting jaws max.	360 mm
Support width	480 mm
Tray height	330 mm
Interchangeable rings	5 x 15 mm, 1 x 25 mm, 1 x 30 mm
Black ring pack included	Yes
Accessories (included)	2 x adj. jaws, 2 x adj. pins, 4 x locking screws
Weight	2.5 kg

FT 01 MT B

FLEXIBLE STUDIO MONITOR TRAY FOR DJ DESK

The practical studio monitor trays extend the functionality of your Gravity® DJ Desk (FT 01) and allow you to perfectly set up your trusty studio monitors.

The FT 01 MT B studio monitor trays are continuously height-adjustable, rotatable by 360° and tiltable by 15°. Precise positioning and tilting of the loudspeakers is made much easier thanks to a scale on the tubes.

To ensure that no annoying frequencies are transmitted from the studio monitors to your DJ Desk, the trays are coated with EVA pads and the front anti-tip device holds your loudspeakers securely in position, even when they are tilted sharply.

Thanks to the ingenious rail system on the DJ desk, the studio monitor trays can also be moved horizontally.

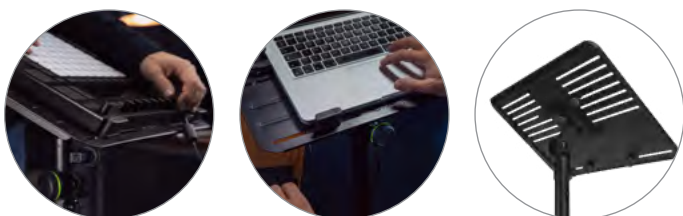

Product number	GFT01MTB
Product type	Stands and tripods
Type	Speaker stands

MULTIMEDIA EQUIPMENT

MA VARIARM M 14

VERSATILE SWIVEL ARM WITH CENTRAL LOCKING MECHANISM - 1/4" MEDIUM

With the VARI®-ARM M 14, Gravity® has created such an universal tool that allows you to use a wide variety of equipment - from an action cam to a mobile recorder - almost anywhere and in any direction in a matter of seconds.

The VARI®-ARM M 14 is an innovative mounting arm with three joints that allow you to move your equipment freely and precisely into any desired position. Its main feature: Only one adjusting screw is needed to lock and unlock all three joints. As soon as you have found your desired position, you tighten the locking screw and the position of the VARI®-ARM M 14 is held tight and safe.

Both ends of the VARI®-ARM M 14 have 1/4" threads on which you can attach almost any camera, handheld recorder or smartphone holder on the market. You can then screw the VARI®-ARM to a Super Clamp with a 1/4" mount and fix your equipment to a truss in the studio or on stage.

Product number	GMAVARIARM14
Product type	Microphone accessories
Type	Vari-Arm
Material	Steel
Colour	Black
Threaded connector	1/4"
Interchangeable rings	1 x 15mm
Black ring pack included	Yes
Dimensions (L x H x W)	290 mm x 70 mm x 20 mm
Weight	0.29 kg

MA VARIARM M 38

VERSATILE SWIVEL ARM WITH CENTRAL LOCKING MECHANISM - 3/8" MEDIUM

With the VARI®-ARM M 38, Gravity® has created such an universal tool that allows you to use a wide variety of equipment - from a microphone clamp to a tablet or an action cam - almost anywhere and in any direction in a matter of seconds.

The VARI®-ARM M 38 is an innovative mounting arm with three joints that allow you to move your equipment freely and precisely into any desired position. Its main feature: Only one adjusting screw is needed to lock and unlock all three joints. As soon as you have found your desired position, you tighten the locking screw and the position of the VARI®-ARM M 38 is held tight and safe. Thanks to the 3-kilogram load capacity, you can even mount a DSLM camera including a standard lens or a heavyweight microphone such as the broadcast classic RE-20.

There is a 3/8" thread at the head of the VARI®-ARM for you to screw on a microphone clip, a pop filter and more. The included adapter (3/8" to 1/4" reduction thread) gives you complete flexibility, allowing you to use almost any camera, handheld recorder or smartphone mount on the market with the VARI®-ARM M 38. Thanks to the solid clamp at the bottom of the VARI®-ARM and its large clamping range from 15 to 35 mm, the VARI®-ARM can also be easily attached to most tables and poles (e.g. to tripods).

Product number	GMAVARIARM38
Product type	Microphone accessories
Type	Vari-Arm
Material	Steel
Colour	Black
Arm length (without clamp)	270 mm
Mounting	Microphone stand, tabletop
Threaded connector	3/8"
Fits tube diameters up to	15 mm to 35 mm
Interchangeable rings	1 x 15 mm, 1 x 25 mm
Black ring pack included	Yes
Dimensions (L x H x W)	335 x 103 x 40 mm
Weight	0.46 kg

MULTIMEDIA EQUIPMENT

MA VARIARM L 38

VERSATILE SWIVEL ARM WITH CENTRAL LOCKING MECHANISM - 3/8" LARGE

With the VARI®-ARM L 38, Gravity® has created such an universal tool that allows you to use a wide variety of equipment - from a microphone clamp to a tablet or an action cam - almost anywhere and in any direction in a matter of seconds.

The VARI®-ARM L 38 is an innovative mounting arm with three joints that allow you to move your equipment freely and precisely into any desired position.

Its main feature: Only one adjusting screw is needed to lock and unlock all three joints. As soon as you have found your desired position, you tighten the locking screw and the position of the VARI®-ARM L 38 is held tight and safe. The included adapter (3/8" to 1/4" reduction thread) gives you complete flexibility, allowing you to use almost any camera, handheld recorder or smartphone mount on the market with the VARI®- ARM L 38.

Thanks to the solid clamp at the bottom of the VARI®-ARM and its large clamping range from 15 to 35 mm, the VARI®-ARM can also be easily attached to most tables and poles (e.g. to tripods).

Product number	GMAVARIARML38
Product type	Microphone accessories
Type	Vari-Arm
Material	Steel
Colour	Black
Arm length (without clamp)	415 mm
Mounting	Microphone stand, tabletop
Threaded connector	3/8"
Fits tube diameters up to	15 mm - 35 mm
Interchangeable rings	1 x 25 mm
Black ring pack included	Yes
Accessories (included)	1x adapter 3/8" female to 1/4" male
Dimensions (L x H x W)	480 mm x 83 mm x 58 mm
Weight	0.51 kg

One main adjustment screw for loosening and tightening all joints

Solid mounting clamp with a large clamping range (15-35 mm)

Incl. 1/4" reduction thread

Swivel arm for free arrangement of equipment

MA VARIARM L TV

VERSATILE SWIVEL ARM WITH CENTRAL LOCKING MECHANISM - 1/4" TV16 LARGE

With the VARI®-ARM L TV, Gravity® has created such an universal tool that allows you to use a wide variety of equipment - from microphone clamps to super clamps and lighting equipment - almost anywhere and in any direction in a matter of seconds.

The VARI®-ARM L TV is an innovative mounting arm with three joints that allow you to move your equipment freely and precisely into any desired position. Its main feature: Only one adjusting screw is needed to lock and unlock all three joints. As soon as you have found your desired position, you tighten the locking screw and the position of the VARI®-ARM L TV is held tight and safe.

Perfect for truss mounting:

Both ends of the VARI®-ARM L TV have a 16 mm TV spigot for attaching the VARI®-ARM to a Super Clamp. You can unscrew the two TV16 spigots. This frees up a 1/4" thread to which you can attach a microphone clamp, pop filter and more.

Product number	GMAVARIARMLTV
Product type	Microphone accessories
Type	Vari-Arm
Material	Steel
Colour	Black
Connector	1/4", TV 16
Dimensions (L x H x W)	415 mm x 58 mm x 83 mm
Weight	0.39 kg

MULTIMEDIA EQUIPMENT

MS TBA 01

MICROPHONE ARM

Overcome your big and small challenges in your day-to-day life as content creator or producer with the Gravity® MS TBA 01 desk-mounted microphone boom arm. With its three joints the boom arm can be placed in pretty much any position you want and its robust steel clamp lets you attach the boom arm on almost any table due to its very wide clamping range.

The microphone cable is neatly packed in the integrated cable guide so that you can quickly exchange the cable when things get a little hectic. Another special feature that Gravity® developed for the microphone holder mechanism allows you to pull out the entire microphone holder with one hand and rotate it in 90° increments, even after the microphone has been screwed in place with the microphone or shock mount.

Product number	GMSTBA01
Product type	Stands and tripods
Type	Microphone stands

MA TH 01 B

TABLET HOLDER WITH VARI®-ARM

Tablets are extremely versatile tools and are not only useful for business and private applications, but also in the studio and on the live stage. Despite their practicality - with their countless apps designed for musicians, DJs, podcasters, and producers - it has always been a challenge to position a tablet effectively, just the way you want it and without hassle.

The Gravity® MA TH 01 B Tablet Holder with VARI®-ARM makes it possible. Its continuously variable clamps hold tablets of any size firmly in place, while the VARI®-ARM allows the tablet to be freely positioned. Once all joints are tightened using the single central setscrew, the entire VARI®-ARM is locked in place and your tablet remains in the position you originally set. Thanks to the solid mounting bracket with its wide clamping range (15-35 mm), the MA TH 01 B can also be mounted to a wide variety of stands, tabletops and other objects - and then quickly removed again.

Your tablet won't slip out of position anymore with the Gravity® MA TH 01 B Tablet Holder - whether you're sitting at your desk recording a podcast, singing in the studio, reading your music scores on stage, or just lying comfortably on the couch watching your favourite show.

Maximum device size	94 mm
Minimum device size	58 mm
Max. device depth	15 mm
Other features	Portrait and landscape format
Weight	0.16 kg

VS TRIPOD 01 B

UNIVERSAL TRIPOD TABLE STAND

Fold it up, pack it away and always have it with you.

With the Gravity® mini tabletop tripod, you have an extremely compact companion that folds up to fit in any jacket pocket and offers countless possibilities for use: as a tabletop tripod for mobile recording of podcasts, as a flexible stick for field recordings and action cam recordings, and even as an attachment for full-grown tripods.

The VS TRIPOD 01 B tripod table stand has a ball head with a 1/4" thread at the top end to freely align recorders, cameras or action cams. The ball head can be folded down sideways up to 90°. The three tripod legs can be height-adjusted in four steps via the adjustment ring.

When out and about, the legs can be folded in and used as an ergonomic handle, for example, for one-handed camera movements with a mounted action cam. It becomes even more versatile when you use one of the 1/4" internal threads integrated in each foot to screw the SV TRIPOD 01 B onto a larger tripod or microphone boom. This way you are always perfectly equipped for video and audio recordings. Whether on the road or in the studio.

Product number	GVSTRIPOD01B
Product type	Stands and tripod accessories
Type	Camera stand
Material	Aluminum
Surface	Powder coated
Colour	Black
Threaded connector 1	1/4" male
Threaded connector 2	1/4" female

Transport length	240 mm
Max. load capacity	2 kg
Interchangeable rings	1 x 15 mm
Black ring pack included	Yes
Weight	0.24 kg

MULTIMEDIA EQUIPMENT

LED STICK 1 B

COMPACT MAGNETIC AND DIMMABLE LED LIGHT BAR WITH USB CHARGING PORT

This compact light bar helps you to generate light wherever you need thanks to the integrated rechargeable battery.

You can choose from two different whites (cool and warm white), switch and continuously dim them as desired.

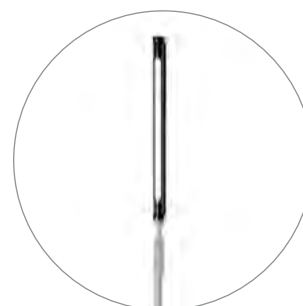

Another absolute highlight are the magnets. The led light bar is equipped with four strong magnets at the bottom, which allow you to attach the lamp to any metal object (e.g. racks, music stands, cases, etc.). This way you don't need to screw the lamp.

And there is more to it than that. Thanks to the two 3/8" threads, the LED STICK 1 B can be mounted both horizontally and vertically to any microphone stand.

For even more flexibility in positioning the light, you can rotate the light bar so that the illumination is always directed to where you need it. For safe transport, the light bar has a wrist strap that allows you to hold the LED STICK 1 B securely.

Product number	GLEDSTICK1B
Product type	Stands and tripod accessories
Type	Light bar
Material	Aluminum, plastic
Colour	Black
Length of light bar	330 mm
Number of LEDs	27
Colour of LEDs	Warm white / cold white

LED PLT 2B

DIMMABLE LED DESK AND PIANO LAMP WITH USB CHARGING PORT

This ultra slim and elegant T-shape desk lamp with silicone coated gooseneck provides uniform illumination exactly where you need it. It features a strip of 18 LEDs that are switchable between warm or cool white (approx. 3,000/6,000 K), and the touch sensitive power button doubles as a stepless dimmer switch. The gooseneck section is easily flexible yet stays put where you bend it. The Gravity® T-shape desk lamp integrates a convenience USB type A port for charging smart phones and tablets and comes with a 12V power adapter. It also makes a great piano lamp, workbench light or bedside reading lamp.

Product number	GLEDPLT2B
Product type	Stands and tripod accessories
Number of LEDs	18
Colour of LEDs	White
Gooseneck length	160 mm
Total length	560 mm
USB Port	Type A, DC 5 V 1.5 A
Switches	Colour selector, touch sensitive button
Switch levels	Continuous, off, on, warm white / cold White
Colour temperature	3000K - 6000 K
Colour rendering index (CRI)	> 75
Current draw	8 W (max. 19 W with USB)
Power supply	AC 100-240 V, DC 12 V 1 A (included)
Weight	0.75 kg

MULTIMEDIA EQUIPMENT

HP HTT 01 B

TABLE-TOP HEADPHONES STAND

Designed for both home and professional use, this elegant table-top headphones stand securely holds up to two large sets of headphones. Convenient slots on the holder facilitate convenient and tidy routing and storage of cables or ear buds. The stand features a die-cast aluminum base and tower construction, whereby the holder itself is made of plastic with a rubberised finish.

A black and white photograph of a stage. In the foreground on the left, a keyboard is mounted on a stand. Several spotlights are visible, casting beams of light across the dark stage floor. The background is dark, with a few more spotlights visible in the distance.

SEATS & BENCHES

Gravity® offers a versatile selection of ergonomic seats and benches specifically designed for musicians. Whether it's in the studio, on stage, or at home, Gravity's seats and benches provide optimal comfort and support for any playing position. The height-adjustable models allow for individual customisation to fit any body size and seating preference, while durable materials and thoughtful design ensure longevity and stability.

SEATS & BENCHES

FEATURES

Ergonomically shaped seat with adjustable height and tilt angle

Backrest adjustable in height and depth

VARI®-Foot technology for leveling uneven floors

Folds down conveniently

FM SEAT 1 BR

HEIGHT ADJUSTABLE STOOL WITH FOOT AND BACKREST

The standing aid FM SEAT 1 BR by Gravity is suitable for universal use on stage, in the rehearsal room or at home while practising; for guitarists, bass players, pianists, string players, wind players and singers. It boasts several of Gravity's special hallmark features.

Let's take a look at the seat first: It has an attractive leatherette covering and can be tilted forwards or backwards at continuously variable angles.

Let's move onto the adjustment options offered by this standing aid: The frame is made of solid steel and with a generous height adjustment range of 67 cm to 97 cm, a comfortable seating position can be achieved for any body height. Even more comfort is provided by the FM BR 1 backrest. It is also covered in pleasant leatherette and can be flexibly adjusted in height and distance to the seat, allowing you to find your perfect sitting posture. The continuously height-adjustable footrest additionally relieves the back while also allowing one or both legs to be rested. Another extremely practical aspect is the integrated levelling foot. The tubular base construction is fitted with our KS Vari-Foot® 1. This ensures a stable and secure footing even on uneven surfaces by means of a simple screw mechanism.

The FM SEAT 1 BR is quick to assemble by means of a folding mechanism and can be folded flat for transport - so it fits into any narrow gap when loading.

Product number	GFMSEAT1BR
Product type	Benches and seats
Type	Stool
Stand material	Steel
Stand surface	Powder coated
Seat material	Imitation leather
Backrest material	Imitation leather
Height adjustment	Locking clamp screw
Height adjustment backrest	Locking clamp screw
Depth adjustment backrest	Locking clamp screw
Min height	670 mm
Max height	970 mm
Max. load capacity	100 kg
Weight	8.7 kg

SEATS & BENCHES

FG SEAT 1

MUSICIAN SEAT WITH GUITAR STAND

Compactness is the key word here because who isn't familiar with forgetting their guitar stand in a hurry on the way to the gig, the stool at the concert venue not being comfortable and the guitar slipping off your leg because the stool is too high. For this there is now the Gravity® FG SEAT 1 musician seat. A clever stool with integrated stand and adjustable footrest for a bar-like feeling on every stage and at home.

The guitar bar stool is a round musician seat designed for guitarists, bassists and singer-songwriters. It boasts several of Gravity's special hallmark features. Firstly, there is the design and functionality of the seat: It is made from a combination of leatherette and fabric. This ensures that the seat surface is breathable at the right places, which significantly increases sitting comfort. This combination also gives the stool a unique and appealing design.

A second highlight is the sophisticated stable body mount for your guitar. This can be folded down and can securely hold any conventional guitar, whether acoustic or electric. Further up, the neck of the guitar is held by a pull-out arm, which can be locked to protect your instrument from any falls. At the touch of a button, the arm can be elegantly retracted under the seat when not in use. For transport, the FG SEAT 1 fits into any narrow space as it can be folded flat.

A third very practical aspect is the particularly stable and height-adjustable footrest. This can be easily pulled up with your foot and enables you to quickly find the optimal leg angle. This way, you always keep your guitar in a perfect position.

*Not suitable for long-term use with guitars that have a nitro lacquer finish.

Product number	GFGSEAT1
Product type	Benches and seats
Type	Guitar barstool
Stand material	Die-cast aluminum, steel
Stand surface	Powder coated
Seat diameter	340 mm
Seat material	Fabric, imitation leather, foam material
Height	720 mm
Max. load capacity	120 kg
Seat colour	Black
For guitars with bodylength (maximum)	560 mm
Adjustable footrest	180 - 300 mm
Transport length	940 mm
Weight	6.28 kg

FD SEAT 1

FOLDABLE ROUND MUSICIANS STOOL WITH ADJUSTABLE HEIGHT

The FD SEAT 1 from Gravity® is a round musician's chair for universal use: In the studio, on stage, in the rehearsal room or at home practicing. For drummers, guitarists, bassists, pianists, strings or wind instruments. It boasts special characteristics typical of Gravity®.

On the one hand, the functionality of the seat: In contrast to most current models from other manufacturers, it is not only made of leather/ imitation leather or fabric, but of a mix of materials. This ensures that the seat surface is breathable at the right places, significantly increasing comfort. In addition, this mix gives the FD SEAT 1 an unmistakable and appealing design that sets it apart from the crowd.

A second highlight is the ingenious height adjustment: It is based on a threaded rod, but with a certain twist. For fine adjustment, simply loosen the locking screw and turn the seat in the appropriate direction. For larger height adjustments, however, the seat surface can simply be pulled up or down and then tightened with the knurled nut.

And thirdly, the Gravity® chair has a particularly sturdy leg construction made entirely of metal. The legs are double-braced and the feet are large enough to ensure stability and reliability.

Product number	GFDSEAT1
Product type	Benches and seats
Type	Musicians chair, round
Stand material	Die-cast aluminum, steel, zinc die-cast
Stand surface	Powder coated
Seat diameter	330 mm
Seat material	Fabric, foam, imitation leather

Weight	4.8 kg

SEATS & BENCHES

FEATURES

Breathable and comfortable seat

Convenient height-adjustment mechanism and handles

VARI®-Foot technology for leveling uneven floors

Solid steel construction

FK SEAT 1

HEIGHT-ADJUSTABLE FOLDING KEYBOARD BENCH

Gravity's FK SEAT 1 keyboard bench, which can be used for a variety of different applications on the stage, in the rehearsal studio or while practicing and composing at home, is for keyboard players, guitarists, bass players, and musicians of string and wind instruments.

It boasts several of Gravity's special hallmark features.

On the one hand, the seat has a range of functions: it is covered with a mix of leatherette and fabric to ensure the seat surface can breathe in all the right places. This provides an elevated level of comfort. The FK SEAT 1's unmistakable and appealing design is also made possible by this combo of materials.

On the other hand, it is worth noting that the bench's height can be adjusted to provide the optimal sitting position for every body size and every type of instrument. The necessary stability is provided by the solid steel frame.

The integrated leveler is another very useful element, and the tubular base construction is outfitted with our KS VARI®-Foot 1. The simple screw-lock mechanism lets the bench stay firmly and securely fixed in place, even on bumpy surfaces.

The FK SEAT 1's 1 hinge mechanism allows the bench to be quickly set up, taken down and folded flat for transport. It can thus fit into virtually any space during loading.

Product number	GFKSEAT1

BAGS & TRANSPORT SYSTEMS

Gravity® bags offer you an easy and safe transport of your stands.
The thick padding and the water repellent material make sure your
equipment is absolutely safe.

TRANSPORT SYSTEMS

CART M 01 B

MULTIFUNCTIONAL TROLLEY (MEDIUM)

Sound technicians, DJs and stagehands: Take the weight off your load with a multi-functional cart. The Gravity® Cart chassis is made of steel to ensure rigidity. Two fixed and two rotating low-rolling resistance, anti-slip rubber tyres provide extra manoeuvrability. The Gravity® Cart is your trusty companion before and after every show. And the best thing is: The light-weight, compact-folded, multi-functional cart lifts easily from the tour bus while also performing effortlessly when fully loaded with equipment. With its (up to 0.98 m) extendable chassis and 150 kg load capacity, your equipment is quickly and safely transported to and from the stage. And thanks to its optimal ergonomic design: without straining your back.

BG CART M 1

WAGON BAG FOR CART M 01 B

The BG CART M1 wagon bag is a practical solution for carrying smaller items of equipment with the Gravity® CART M 01 B.

Made from robust, water-repellent 1680D nylon, it provides protection and stability for your equipment. The simple assembly allows for easy attachment to the handles of the Gravity® CART Medium. The adjustable straps allow the length of the bag to be adapted to the set length of the CART, so that the bag remains flexible and foldable even after assembly.

The Gravity® BG CART M1 wagon bag is robust, flexible and simply practical - an indispensable aid for transporting equipment.

Product number	GBGCARTM1

Height	650 mm
Total width	530 - 1005 mm
Weight	1.18 kg

CART L 01 AC 1 SET 1

RAPID DESK FOR CART L 01 B INCL. BARS

Turn your Gravity CART into a mobile workspace!

With the CART L 01 AC1 SET 1 you can turn your existing CART L 01 B into a stable, mobile work surface in no time at all. Both the bars and the table are made of powder-coated steel and - like all Gravity stands - are extremely stable and sturdy. In combination, a generous maximum load capacity of up to 50 kg is achieved on the top tier. On the lower tier, up to 120 kg can be transported.

For assembly, the screwed supports are simply inserted into the recesses in the middle of the Rapid Desk, the trolley is unfolded and extended to the now maximum possible dimension. No further fastening or screwing of the support is necessary.

CARRY BAGS

FEATURES

Robust sandbag made of waterrepellent 1680D Nylon

Inner bags with velcro fastener can be filled comfortably

Can be filled with sand, gravel or similar to weight down

Practical lugs

BG SB S1 / L1

FILLABLE SANDBAG WITH LUGS FOR TRIPODS SMALL / LARGE

The BG SB sandbags are available in two versions: SMALL for mic stands and LARGE for C-stands and speaker and lighting stands. Handling the bags is as easy as it is effective. Each bag has two inner bags that can be filled with sand, gravel or other materials as desired - and fit perfectly into the two recesses. The BG SB sandbag is then simply set down on the stand base or leg to hold the stand down firmly and reliably. The carrying handles offer additional comfort so that the bags can be gripped and repositioned with one hand.

To ensure that potentially heavily filled bags do not slide down on steep stand legs, they have a special non-slip mesh surface on the underside. In this way, the BG SB can be quickly and easily attached, removed and set back down again during hectic changeovers. (Velcro fasteners and straps are not necessary to fasten the bag to the stand leg). If strong winds are an issue, you can use the integrated metal eyelets on the corners to securely connect the bags to the stand using cable ties or rope.

For worry-free use on open-air stages and restaurant terraces, or for outdoor film shoots, the BG SB features a water-repellent outer material made of 1680D nylon, which makes sure that the sand or gravel inside do not become moist.
