

Value Added Services

Convenient taylor-made
customisation

Convenient taylor-made customisation

Special occasions create special event technology requirements: be it visual changes, such as custom paint finishes or printing, or the customisation of technical specifications.

The Adam Hall Group's value-added service (VAS) can help you to implement such custom solutions. Whether you want to create visual highlights, label your rental equipment with your logo, or you need alternative connectors or speakers – our VAS team will be delighted to advise you.

Our service also provides special packaging, such as with your logo or barcode. High-quality sales packaging is available in a range of five different sizes, allowing you to sell your top sellers and small parts in appropriately packaged quantities. Thanks to its Euro-punching the packaging units are compatible with any standard POS display, thus optimising the targeted presentation of goods.

Need individual advice or have requirements not covered by the listed services? Please contact our VAS team and we will develop a bespoke solution tailored to your needs.

Logo print service

We offer you custom printed cable ties and lashing straps. We also offer printing your logo on most products of our portfolio. Cable ties are available in different colours and sizes. Smaller quantities (black and white print only) are tampon-printed in Germany. Larger quantities (black, white and multicolour) are printed in China. Lashing straps can be individually printed as well as embroidered.

Having your company logo printed on speakers, light effects or stands not only shows, whose property that equipment is. It also is a perfect advertising for your business. We offer printing your logo up to a diameter of 8,5 cm on most products with short lead times, bigger prints are also possible. Simply get in touch with our VAS team to talk about pricing and lead times for your individually branded gear.

- Custom printed cable ties with your company's logo
- Small quantities available in black and white with short lead times
- Larger quantities available in multi-colour

- Custom printed with your logo
- Custom embroidery available for larger quantities
- Mark your equipment to avoid gear loss or theft on big events

- Almost any product of our portfolio can be individualised with your logo
- Available on request with short production time
- Print any logo or graphic on speaker and/or front grille

Product customising

Most of our products can be customized according to your requirements. Be it custom changes of certain specifications like different plugs and jacks, the exchange of speakers or any other modification – our VAS team will work out the best way to realize your custom products. Also sometimes, professional event or install technique requires a special lacquer in a specific RAL colour to perfectly fit into an environment – or to stand out and leave a remaining impression. For that reason, we offer customized lacquering for most of our products. Do you want your LD Systems CURV 500 to appear in shiny red or deep blue? No problem. Simply contact our VAS team!

- Technical customisation of existing products
- Almost any product of our portfolio can be customised
- On request according to your specifications
- Change connector types of a fixture, the speaker type of your PA system and more

- Choose any RAL colour to customise the design of our products
- Match speakers, mounting hardware and more to your install project
- Create unique designs to set yourself apart from the competition
- Print any logo or graphic on speaker and/or front grille

Display ready custom packaging

Order your best selling products in individually branded, transparent plastic bags. There are five different sizes of bags, so you can offer products in pre-counted quantities. Thanks to the standard Euro-perforation, the plastic bags can be suspended on promotional displays and at the point of sale.

You choose if you want the bags to be printed with your company's logo as well as barcode, SKU or EAN (according to your requirements).

- Order your best seller items in individual packaging
- Display ready thanks to EURO perforated bags
- Your logo and barcode / SKU / EAN
- Protects products from scratches and dust
- Available for most products (except for large and bulky items)

- Create your own custom product sets
- Pre-counted quantities = logistical advantage
- Display ready thanks to EURO perforated bags
- Your logo and barcode / SKU / EAN
- Protects products from scratches and dust
- Available for most products (except for large and bulky items)

AVAILABLE BAG SIZES:

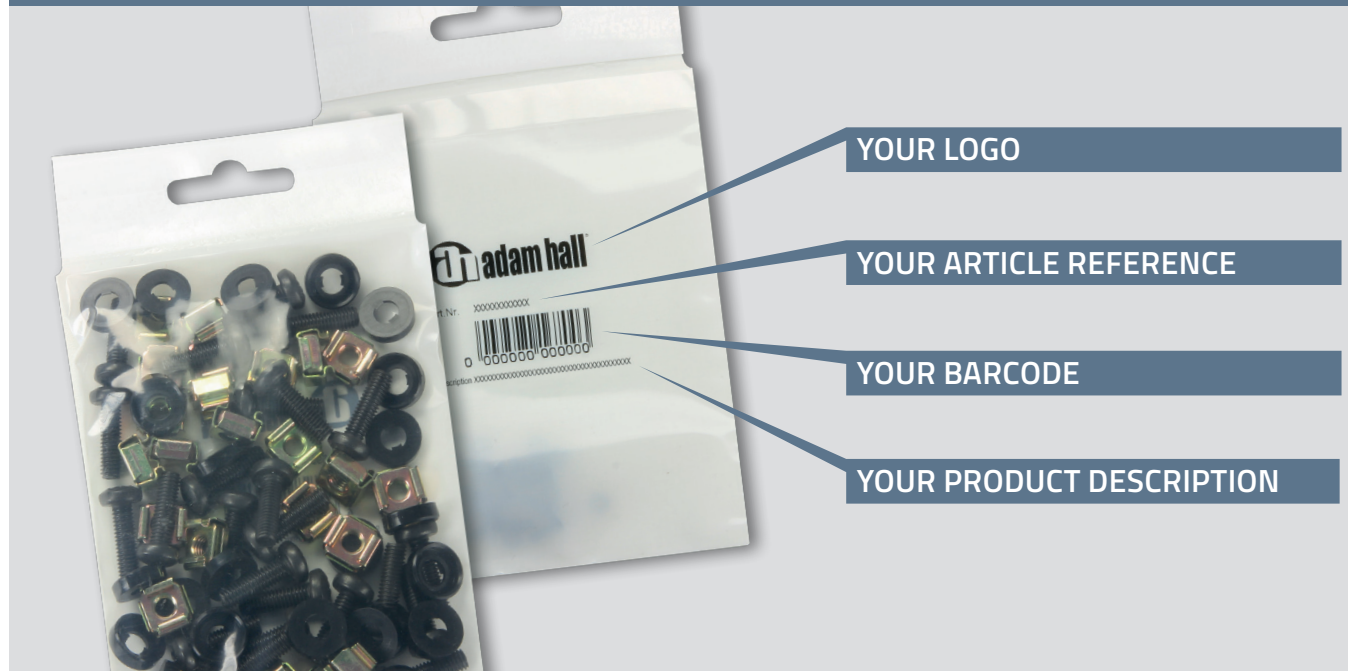

- B1 – 100 x 185 mm
- B3 – 150 x 235 mm
- B5 – 110 x 365 mm
- B6 – 250 x 315 mm
- B7 – 250 x 435 mm

Additional sizes available upon request.
